DETAILED ACTION

Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet). (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A
- "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Information Disclosure Statement

The listing of references in the Search Report is not considered to be an
information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2)
requires a legible copy of: (1) each foreign patent; (2) each publication or that portion

Application/Control Number: 10/597,669

Art Unit: 3727

which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

 Claims 5, 7, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5, it is unclear as to what is meant by "wherein the driving arms comprise metal, preferably soft-iron." Are the driving arms required to be soft-iron?

Art Unit: 3727

Claim 13 recites the limitation "the longitudinal central axis" in Lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filled in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filled in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- Claims 1, 2, 4, 12, 14, and 16 rejected under 35 U.S.C. 102(b) as being anticipated by Maurer et al., US 5,500,970.

Maurer et al. disclose the claimed invention including two driving arms (8) wherein each driving arm is arranged so as to be rotatable about a rotation axis situated at one end of the driving arm (Figures 2 or 15A-15D) and at least one arm actuating member for bringing about reciprocating movements of the driving arms in opposite rotational directions (the arm actuating member may include 16, 30, 43, or 75).

Regarding claim 2, there is a rotatably arranged cam having an even number of lobes (75, there are two lobes, Figures 15A-15D) and biasing means (11 or 69). Regarding claim 4, there is an electric motor (Column 9 Lines 19-39) having a drive shaft (73), wherein the cam is arranged at the drive shaft of the electric motor (Figure 11).

Regarding claim 12, the device is a toothbrush (title) comprising at least one bristle

Application/Control Number: 10/597,669

Art Unit: 3727

carrying shaft (8), at least one bristle arranged at an end of the bristle carrying shaft (10), and a driving means (means may include any component of the drive mentioned above), wherein the bristle carrying shaft is associated to a driving arm of the driving means (see Figures). Regarding claim 14, there are two bristle carrying shafts (each 8) and two bristles (each 10), wherein the bristles are arranged such that one bristle is a continuation of the other bristle (in that they continue on opposite sides of a tooth, Figures 15A-15D). Regarding claim 16, at least one bristle carrying shaft is supported by a slide bearing (at 82, 83; Column 7 Lines 15-32).

Claims 1 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by
 Witt, DE 73435 (English translation not available to the Examiner at this time).

Witt discloses the claimed invention including two driving arms (c²) wherein each driving arm is arranged so as to be rotatable about a rotation axis situated at one end of the driving arm (Figures 3-4) and at least one arm actuating member for bringing about reciprocating movements of the driving arms in opposite rotational directions (d¹). Regarding claim 12, the device is a toothbrush comprising at least one bristle carrying shaft (b), at least one bristle arranged at an end of the bristle carrying shaft (see Figures), and a driving means (means may include any component of the drive mentioned above), wherein the bristle carrying shaft is associated to a driving arm of the driving means (see Figures). Regarding claim 13, a longitudinal central axis of the bristle carrying shaft (axis through which b extends longitudinally) that coincides with the rotation axis about which the associated driving arm is rotatable (Figures 3-4).

Art Unit: 3727

Figures), wherein the bristles are arranged such that one bristle is a continuation of the other bristle (in that they continue, see Figures).

Allowable Subject Matter

- 6. Claims 3, 6, 8-11, 15, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. Claims 5 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura C. Guidotti whose telephone number is (571) 272-1272. The examiner can normally be reached on Monday-Wednesday, 6am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Monica Carter can be reached on (571) 272-4475. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
